

Paired with TT-3600 to make tortilla automatically

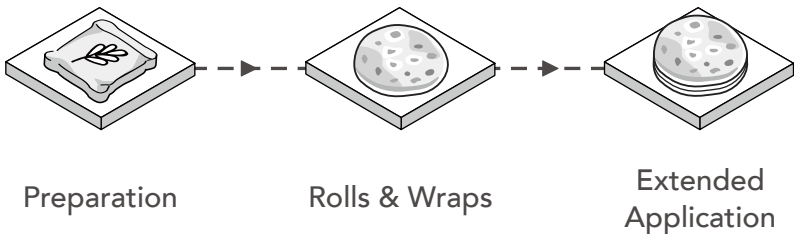

Putting divided tortilla dough balls by hand. The dough balls would be first evenly flattened by the pressing & heating system, and then baked through tunnel oven. To facilitate packing, the tortilla production line is able to stack required quantity of final products in a pile.

Capacity: 3,600 pcs/hr | Product dimension: 6–10 inches

Let ANKO create a tortilla production solution for you.

You can have one-stop shopping for not only tortilla making machines, such as sieving, wrapper making, and packaging, but also your own proposal that is made ANKO’s sales engineers according to your production needs, factory layouts, existing equipment, human resources, etc.

Burrito Forming Machine

BR-1500

Specifications

Capacity:  
**1,000** pcs/hr

Product weight:  
**125–145** g/pc

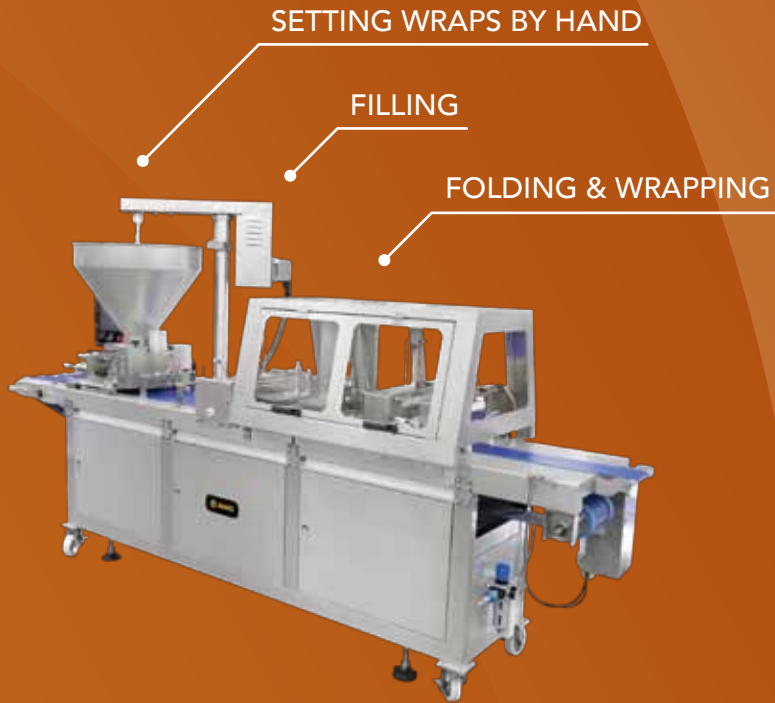

Dimensions: 3,400 (L) x 680 (W) x  
2,000 (H) mm

Power: 1.5 kW

Filling hopper capacity: 80 kg

Weight (net): 375 kg

\* Production capacity is for reference only. It'll change according to different product specifications and recipes. Specifications are subject to change without notice.

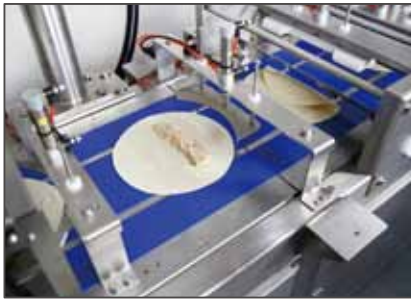

Easy to use.

Simply put tortilla and push the start button to automatically fold and roll burrito.

The folding device can wrap burrito tightly to enhance production quality.

The unique design can fold hard and thick tortilla firmly without springing open to make consistent quality products.

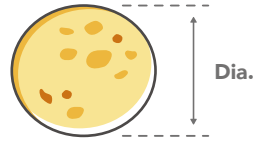

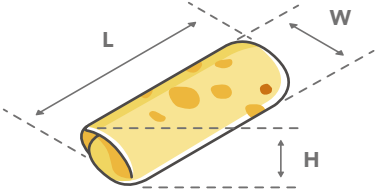

- The special filling system can accurately deposit same amount of filling in position.
- The folding device is equipped with a safety guard to protect users.
- Easy to clean and maintain.
