

# Accutek Desiccant Inserter

Accutek is the leading innovator in the packaging industry, and that is why we are proud to offer our clients a variety of packaging equipment technologies, including desiccant inserters. From start to finish, you will find everything you need for packaging at Accutek.

Desiccant is a dehumidifying agent that attracts any moisture in a container and locks it away from the product. Packets filled with desiccant are placed inside pharmaceutical and nutraceutical tablet and powder containers to keep capsules from sticking together and powders from clumping.

The Desiccant Inserter dispenses packets filled with desiccant that are belt fed from a reel. The Desiccant Inserter cuts a single packet from the end of the belt and drops it into a bottle. A bottle is held under the packet chute until the packet is dispensed. The bottle indexing system then releases the filled bottle and stops the next empty bottle under the packet chute. The inserter can drop up to 50 packets a minute into bottles.

**Dimensions:**

Height: 5 Ft.  
Length: 4 Ft.  
Depth: 2 Ft.

-----  
**Weight:** 550 lbs  
-----

**Working Direction:**

Left to Right or Right to Left (Optional)

**Inserting Speed:**

40-50 bottles/minute  
-----

**Electrical:**

220 Volt 60Hz, 500 Watts  
-----

**Air Requirements:**

100 PSI – 2CFM

**Key Features:**

- Insertion speeds up to 50 CPM
- Heavy-duty construction
- Guillotine packet separator
- Touch screen operation
