

## MasterPACKer® X5

THE NEW MASTERPACKER® X5 CASE READY  
MOTHER BAG SYSTEM IN A REGULAR AND A  
NARROW CONFIGURATION

**SAVE UP TO 50% IN  
MATERIALS & GAS**

**Fast and Efficient**

**Multiple Sustainable Package Options**

**Increases Workforce Optimization**

**User Friendly, Intuitive Controls**

**Excellent ROI**

- ▶ Hi-Flow Snorkel System for superior vacuum/gas flush operation
- ▶ Low & High O<sup>2</sup> Options
- ▶ Precision with servo motors & timing belts
- ▶ Dual impulse seal bar
- ▶ Fast & controlled bag feeding
- ▶ Patented eco-friendly film management
- ▶ Complete processing system integration
- ▶ Small footprint

**High speed loading for all case ready applications**

**CASE READY MEAT | FOOD SERVICE BACON**

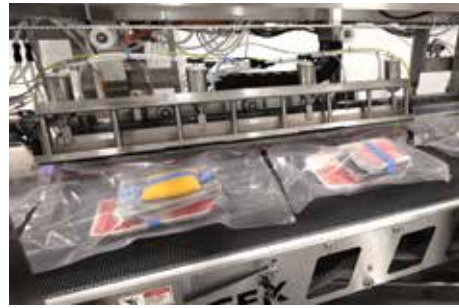

**ARTISAN BREAD | HAMBURGER & HOT DOG BUNS | HOAGIE & SUB ROLLS**

The MasterPACKer® is a fast and efficient, fully automated modified atmosphere packaging system which is used for retail ready mother bag production. This compact machine automatically inserts pre-wrapped trays into mother bags at speeds up to 15 bags per minute.

PLC controls ensure consistent vacuum and gas levels while providing maximum flexibility. The ability to change to double and triple layers is automatic with the easy-to-use, intuitive, touch-screen control panel.

**Infeed Conveyor**

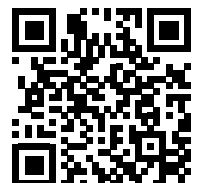

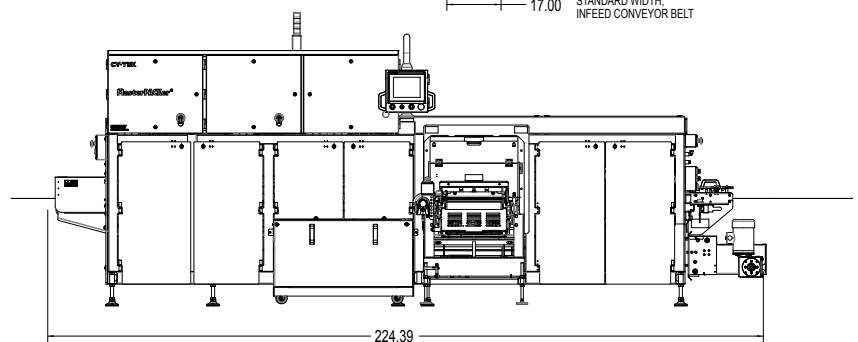

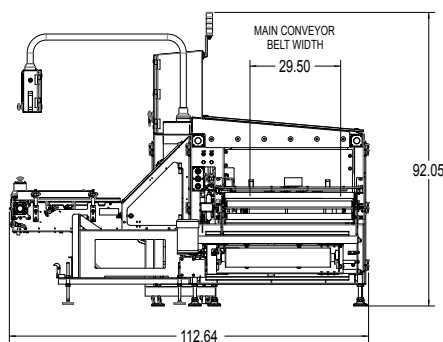

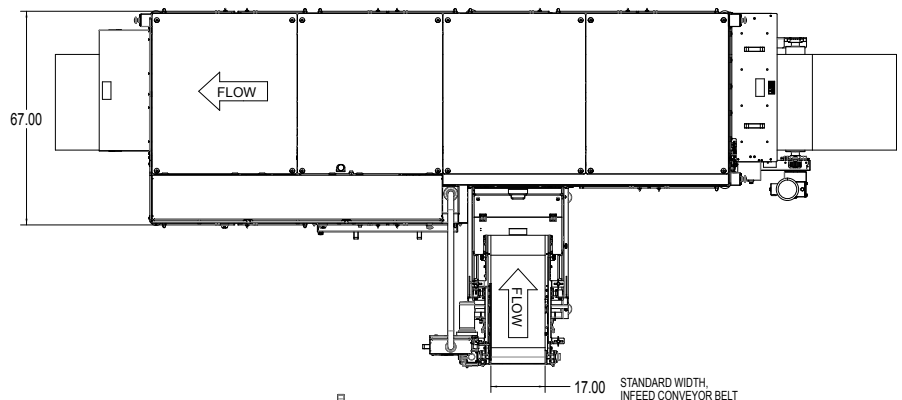

**Vacuum Gas Flush**

**Master Bag**

### REGULAR CONFIGURATION MasterPACKer® X5 - Features:

- ▶ 15 mother bags per minute (2 bags per cycle/two separate high-flow snorkels/62" Seal Bar)
- ▶ Bag widths from 15" to 30"
- ▶ New shaft-driven film unwind
- ▶ Open frame design
- ▶ IP68/IP69 Washdown
- ▶ Ergonomic location of the control cabinets
- ▶ Linear Servo Technology
- ▶ Regular Configuration

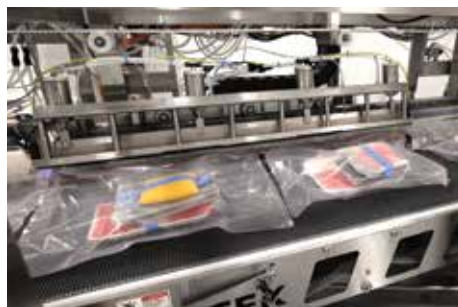

The MasterPACKer® is a fast and efficient, fully automated modified atmosphere packaging system which is used for retail ready mother bag production. This Narrow configuration of our already compact machine automatically inserts pre-wrapped trays into mother bags at speeds up to 15 bags per minute.

PLC controls ensure consistent vacuum and gas levels while providing maximum flexibility. The ability to change to double and triple layers is automatic with the easy-to-use, intuitive, touch-screen control panel.

**Infeed Conveyor**
