**Cabinplant®**

# Automate your weighing of extremely sticky products and cut labor cost by up to 70 %

## Increase earnings and food safety

Introducing the new Cabinplant multihead weigher, MHW SF Extreme, one of the world's most efficient and innovative weighing solutions for extremely sticky products. With efficient and precise combinatorial weighing and the ability of handling of sticky products like mixed salads, coleslaw and tuna flakes, the MHW SF Extreme can easily process complex and demanding tasks. This will automate your production and thereby cut manual handling by up to 70 % and increase food safety by bringing down human contamination risks.

## New MHW applications

With our new MHW SF Extreme the use of multihead weighing can be introduced to many different products especially in the convenience food industry. With this type of multihead weigher you can automate the weighing of products like ready-to-eat pre-mixed salads that contain dressings, oils or products mixed with other sticky dressings. The MHW SF Extreme may also be used for weighing out products like tuna flakes, pre-mixed ready meals, pulled meat products, and other similar products.

# Improve your business

## Proven performance

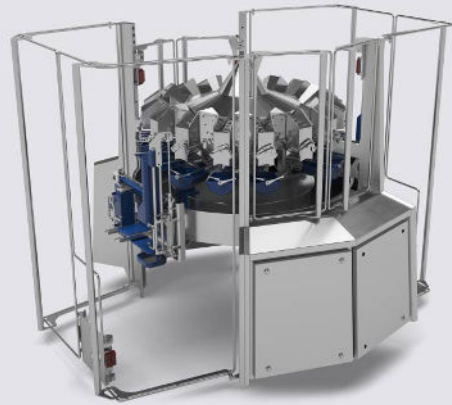

The Cabinplant MHW SF Extreme is based on our multi-head weighers with the screw feeding principle, which was invented by Cabinplant back in 2005. The screw feeding principle introduced the benefits of multihead weighing to processors of wet and sticky products and has made it possible for industries, in the meat & poultry, fish & seafood, fruit & vegetables and convenience food industries, to achieve higher weighing accuracy and to reduce give-away costs considerably.

## Extremely small footprint

With its height of only 1,750 mm the Cabinplant MHW SF Extreme has one of the smallest footprint on the market for MHWs and can be placed in any production hall without having to cope with restrictions of building measurements in regards to height.

This makes MHW SF Extreme a natural choice for any large or small processing companies that want to automate the weighing of extremely sticky products.

## MHW SF Extreme

## Advantages

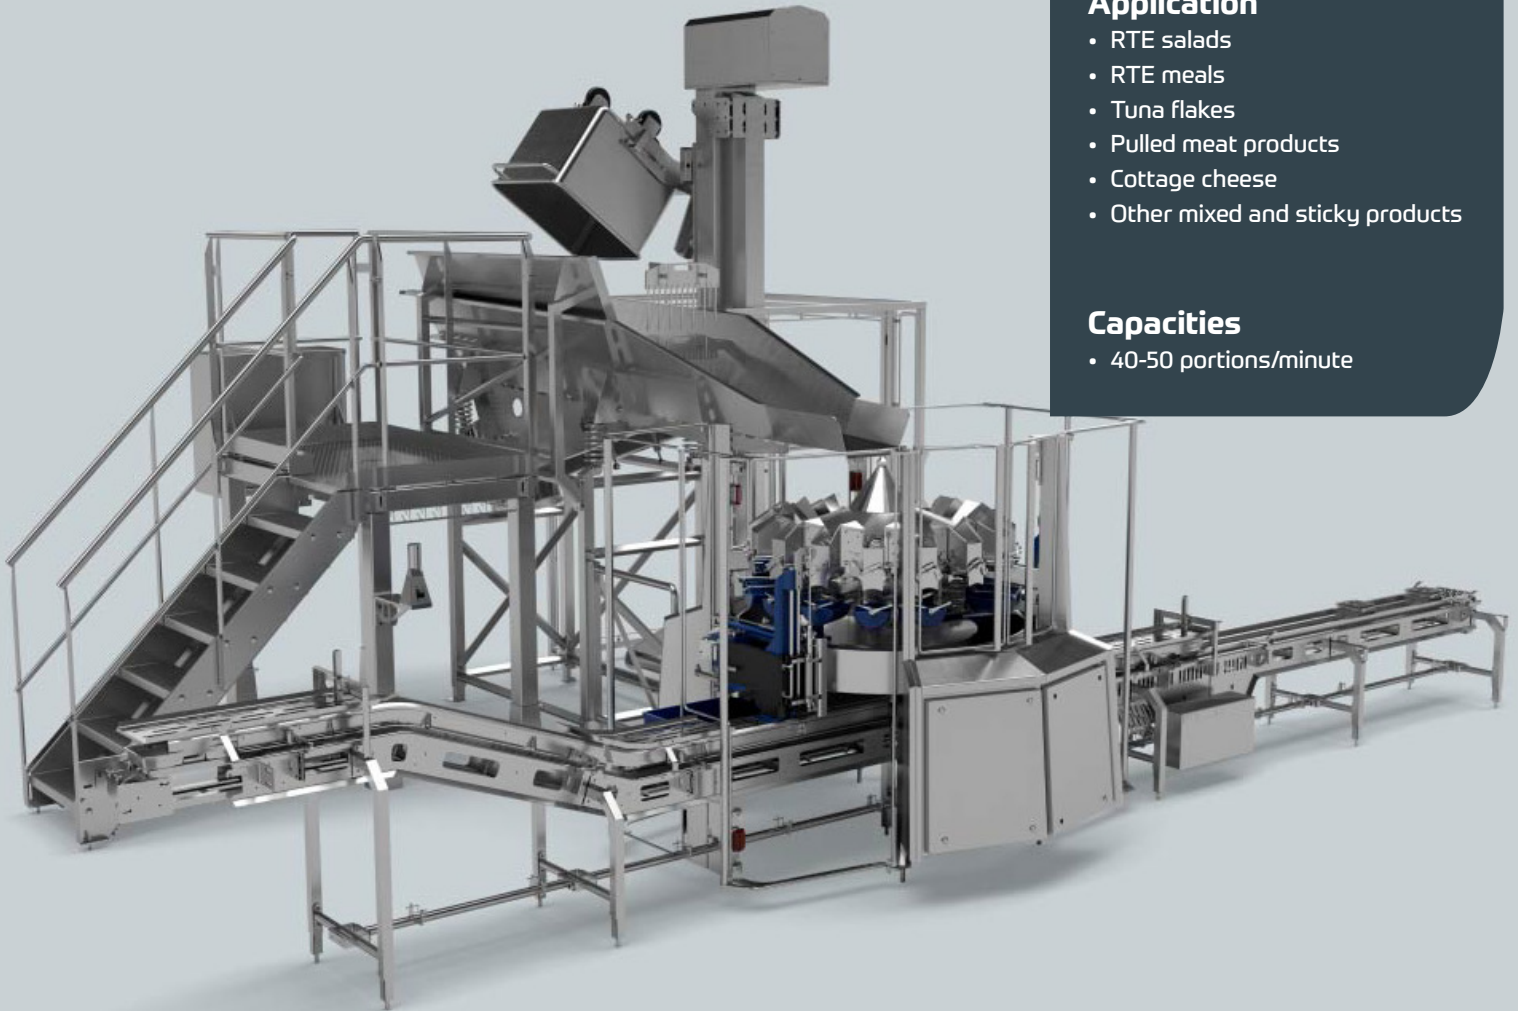

- Cuts manual labor by up to 70%
- Cleaning time/change-over time down to 5-10 minutes

## Application

- RTE salads
- RTE meals
- Tuna flakes
- Pulled meat products
- Cottage cheese
- Other mixed and sticky products

## Capacities

- 40-50 portions/minute
