

# GEA Aquarius BunchWrapper

## The original. Even Better

### Simplicity format change, without compromise

The key to perfect your lollipop production process when frequently changing to another format is to make sure it goes fast and smooth, with simplicity in how to change over to another format for your operators.

Over 20 years our BunchWrapper series fills the need for high speed wrapping of your lollipops. Never losing sight on our customers demand for efficient and reliable high-speed machinery. We offer hermetically sealed lollipops with optimal productivity and fast changeovers for the confectionery market. Further offering flexibility in continuous packaging in bags or containers or tools for marketing purposes.

With the latest optimization it's perfectly fit to optimize your wrapping output further when frequently changing over.

You can choose between wrapping multiple diameter lollipops without compromising on efficiency due to the simplicity of the change overs and reach the ultimate output.

A win – win situation as you have the optimal highest output with each diameter, with ease of use via chosen recipe which guarantees safe change over for the operator to another diameter lollipop.

#### The key benefits for you are:

- **Increased output** – when frequently changing over to another diameter and size lollipop
- **Simplicity** – automatic configuration ensures fast, efficient and safe change over
- **Future proof design** – the machine is already prepared for future change overs to different diameter lollipops.

#### Easy to use

No more wrong settings in the machine, due to automatic configuration. The combination of the touchscreen and the intelligent sensors make sure that the sorting disk and the transfer system are automatically set in the correct position.

#### Easy to install

Simplified faster and safer change overs are at your disposal. We are introducing easy installation for each diameter lollipop which ensures you will be up and running within half an hour.

#### Easy to integrate

Due to the future proof design, no more mayor manual settings in the machine are needed. When deciding to wrap a significantly different size at a later stage, the machine is already prepared for that.

#### Easy to maintain

The future proof design and automatic configuration and the fact that it does not require extra consumables will reduce and keep your maintenance budget to a minimum.

Lollipop diameter (mm)	30	25	20	
Machine speed (L/min)	800	800	800	
Output (L/min)	768	776	784	
Efficiency of sorting disk (%)	96	97	98	

Lollipop diameter (mm)	30		25		20		
Shifts	16 hours	24 hours	16 hours	24 hours	16 hours	24 hours	
Additional output / year (mio)	0	0	2.304.000	3.456.000	4.608.000	6.912.000	
Additional sales volume / year (€)	0	0	69.120 €	103.680 €	110.592 €	165.888 €
