

KOMPAKTA

POUCH MAKING MACHINE

KOMPAKTA POUCH MAKING MACHINE

Bottom punching

Bottom sealing and cooling

Side sealing

SHAPE YOUR POUCH AUTOMATICALLY

Loaded with two reels for the front and back of the pouch and several reels for the bottom, depending on pouch size, Kompakta automatically unwinds, punches and cuts the material on reels using blades and cutters, then sealing on 3 sides to obtain the finished pouch with a feed of 2, 3 or 4 pouches.

Size changeover takes just a few minutes; punching, cutting and sealing stations are easily replaced and their position is adjusted based on the index change.

Standard equipment will feature an end-of-line packer to arrange the pouches in rows and subsequently inserting them into boxes or trays.

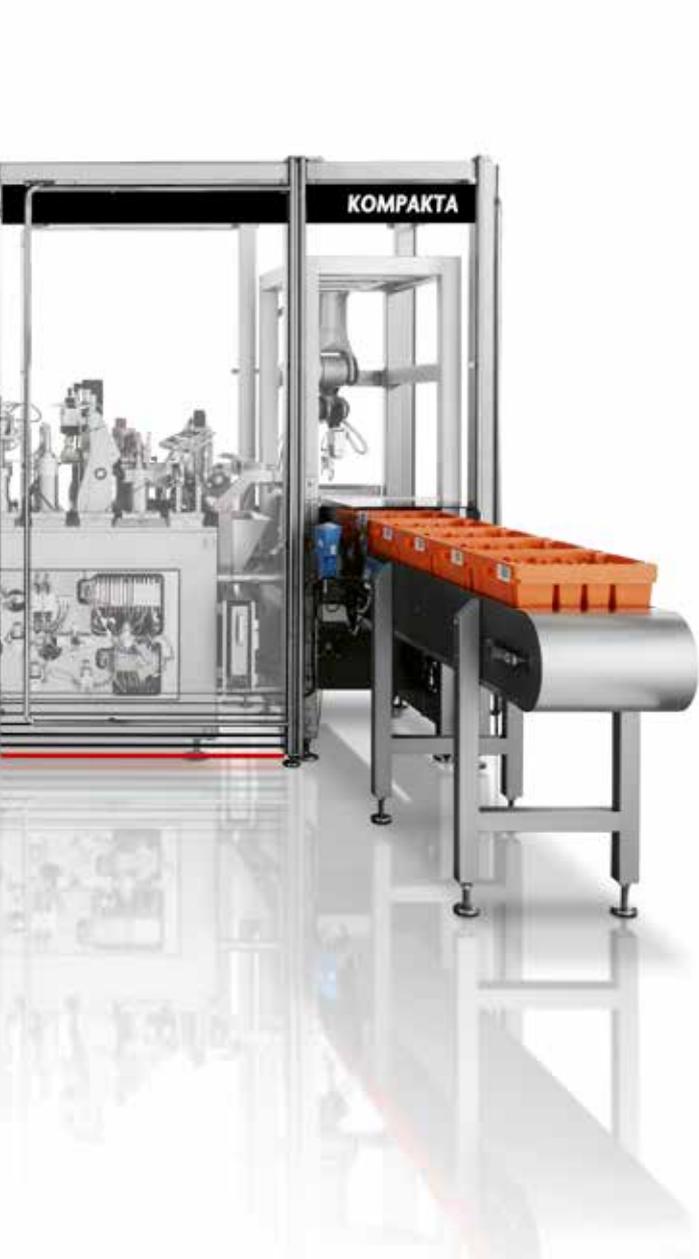

Cutting station and pulling

Side cutting, optional stacking unit

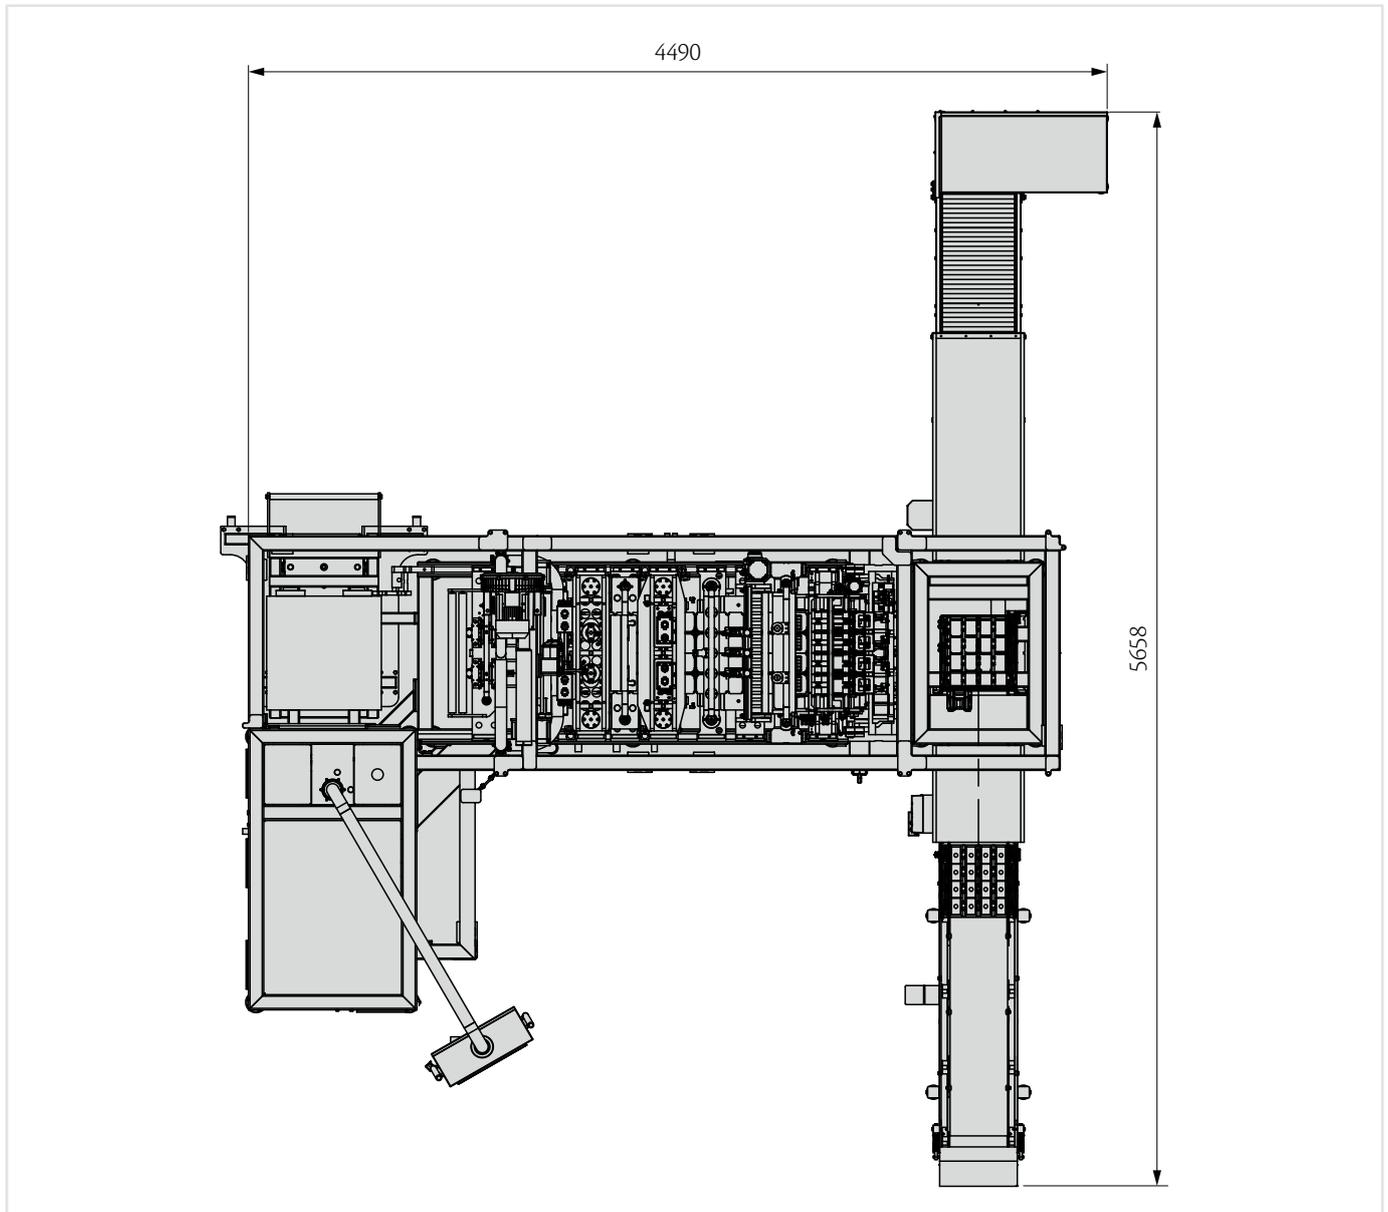

Optional tray loading unit

- HIGH-SPEED REEL REPLACEMENT FOR INCREASED PRODUCTIVITY
- AUTOMATIC IDENTIFICATION AND REJECTION OF SPLICING
- SIMPLE AND FAST SIZE CHANGEOVER FOR GREATER VARIETY AND CREATIVITY

TECHNICAL DATA

Nominal production speed	400 ppm
Pouch height range	From 100 to 200 mm
Pouch width range	From 70 to 150 mm
Pouch material	Triplex, Quadruplex
Total installed power	25 Kw
Weight	2000 Kg
