

XWRAP

TISSUE WRAPPER

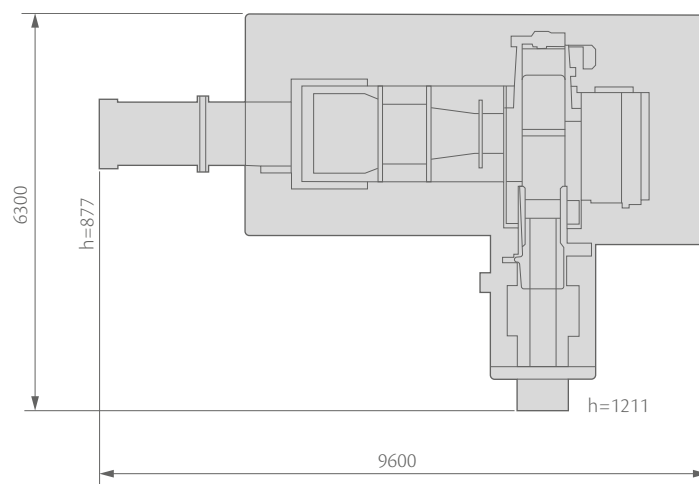

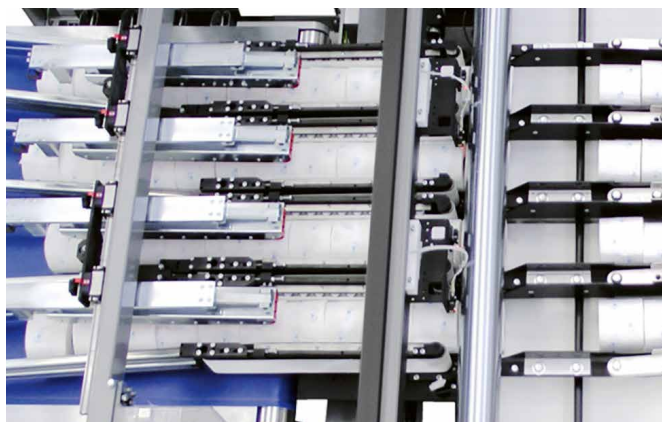

XWRAP is an automatic wrapping machine for bathroom and household tissue towel rolls. This high-speed servo sequential multi-roll packaging machine is suitable for wrapping single- and double-layer formats, with thermo-sealable materials PE or PPE. Easy management and guided changeover operations can be quickly carried out through the HMI. Full size adjustments can be stored in recipes for fast, accurate and repetitive setting. Wide flexibility and reduced downtime to switch from one pack configuration to another is guaranteed, also thanks to a reduced number of changeover parts and simple adjustments to be carried out.

HIGHLIGHTS

- Both right or left hand
- **Fast**, up to 180 ppm
- **Flexible** from 1 to 5 lanes, from 1 to 2 layers, BRT and HHT
- **User friendly** with automatic changeover
- **Easy** to install and maintain
- **IMA Sentinel** native, for machine performance monitoring
- **Compact footprint** with integrated electrical cabinet
- **Dual capability**: one equipment material adaptive poly & paper ready

TECHNICAL DATA

Production speed	Up to 160 (180*) packs/min, depending on pack configuration	
Servo motors	15-20 depending on possible configuration	
Product range (mm)	Min	Max
Diameter	90	170 on 4 lanes, 200mm on 2 lanes*
Length	90	300
Machine range (mm)	Min	Max
Width	180 (90*)	600
Length	180 (90*)	600
Height	90	300
Poly Capability (mm)	Min	Max
Reel width	320	1500 - 1800*
Repeat lenght	225	850 - 950*
