Continuous mixers

General

The Ottevanger continuous mixer is pre-eminently suitable for equal dividing liquids into powdered material (for instance, molasses into mash).

A dosing pump with adjustable drive can be supplied with the mixer. The quantity of liquid is exactly registered by the flowmeter which is suitable for automatic control.

The screw feeder ensures an even flow of meal into the mixer.

Advantages

- » rigid construction
- » executed with plastic liner for reduction of contamination
- » low cost of wear of mixing paddles
- » large doors enabling easy replacement of worn parts
- » low power consumption (approx. 0,7 kW/T)
- » adjustable mixing paddles for optimum mixing result

DIRECT DRIVE

V-BELT DRIVE

Type	capacity (t/h)	motor (kW)	Dimensions (mm)					Weight incl. Motor (kg)
