

**OTTEVANGER**  
MILLING ENGINEERS

# Square silos

## General

Ottevanger Milling Engineers develops, supplies and constructs high quality silos. Successfully completed projects all over the world stand testimony to our skill and expertise. The core of our 100% custom-made system is formed by standardised square or rectangular steel panels. This concept allows maximum configuration possibilities.

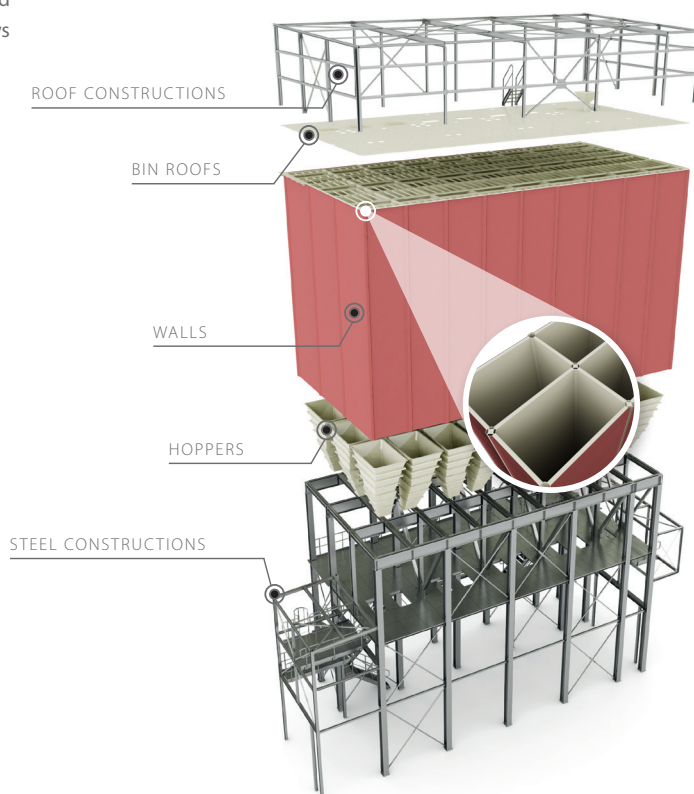

## We supply:

- » smooth & profiled wall bins
- » hoppers and bunkers
- » bin roofs
- » steel and roof constructions
- » roofing materials and cladding

A clever design gives many advantages. That explains why our silos are square - over 25% extra storage capacity. Smooth walls and an ingenious hopper design guarantee an optimal discharge of the stored products. The silos can also be flexibly configured, so that your storage facility is customised to perfectly suit your wishes.

## The advantages of square silos:

- » maximum storage capacity
- » optimum flexibility and traceability
- » part of your process
- » structural part of the building
- » 100% custom-made
- » greater sustainability
- » efficient transport
